

PAL Hand Gel Range

PAL Hand Gel/Rub are alcohol-based products developed for hand disinfection.

PAL Products are very powerful disinfectants highly effective against transient skin micro-organisms, such as Bacteria, Fungi, Viruses and Protozoa.

PAL Hand Products have been specially formulated to provide a powerful, fast drying Hand Sanitiser.

Applied in all Hygienic & Hand Disinfection areas

Suitable for catering, food processing and packaging industries.

High viscosity provides longer-skin contact time.

PAL Products have overcome the problems of dry skin, often associated with this type of product, where frequent hand cleansing is required.

PAL will kill a wide range of pathogens and will provide this residual action against these organisms for up to two hours.

PAL Alcohol Hand Sanitizers contain skin emollients to reduce skin dryness, apply after each hand washing and allow to dry

PAL Alcohol Hand Hygiene Sanitizer Gel

- Does not dry out the skin
- Does not cause Ecological Problems
- Provides Protection for up to 2 Hours
- Just Apply & Allow to Dry
- Kills, Salmonella, Typhimurium, Pseudomonas Aeruginosa, E coli, Staphylococcus Aureus, Streptococcus Faecalis, Proteus Mirabilis Klebsiella Pneumoniae and other Pathogens.

Application

Apply 2-4 ml of PAL Products to clean, dry hands and massage thoroughly into the skin, paying attention to fingertips, nails and the creases of the fingers.

After one minute, the gel evaporates, leaving the skin dry with a feeling of refreshing softness and smoothness.
